SUMMARY

Fullstack developer with a Computer Science degree and a Python backend foundation (Django, DRF, FastAPI), building web products end to end with Next.js, React, TypeScript, NestJS and PostgreSQL — from database and APIs to UI, tests and Docker deployment. Uses AI-assisted development (Claude Code) daily to ship fast with reviewed, tested code.

EXPERIENCE

Fullstack Developer — Lumarc, Architecture & Design Studio (Tashkent) Sep 2026 – Present

- Company website lumarc.uz: developing a Next.js frontend and NestJS + Prisma/PostgreSQL backend with a JWT-protected admin panel, Swagger docs and content in Uzbek, Russian and English. Currently delivering a full redesign: scroll-driven video hero, project pages, 360° virtual tours (Photo Sphere Viewer) and an interactive 3D model viewer (Three.js).
- **Lumarcos** (lumarcos.uz): built an AI platform for architects — render post-production, image studio and image/video generation via Google Gemini/Vertex AI, fal.ai and Kie.ai, with OTP/email login, credit billing (Payme, Click) and an admin panel.
- Lumarcos stack: NestJS + Prisma/PostgreSQL, BullMQ + Redis queues for AI jobs, S3 storage (MinIO), Next.js 16 / React 19; Jest, Vitest, Playwright; Docker Compose + Caddy (HTTPS) on Linux.

PROJECTS

- **UzStroyMarket** — uzstroymarket.uz: multi-vendor marketplace for construction materials with customer site, vendor and admin panels; transactional stock reservation, idempotent checkout, per-vendor orders, audit log, Telegram phone verification, uz/ru/en. *Next.js, React, TypeScript, Fastify, Prisma, PostgreSQL, grammY, AWS.*
- **MoneyFlow** — @moneyflow_uz_bot: Telegram bot for personal and business income/expense tracking in 6 languages; free-text entry, daily-to-yearly reports with period comparison, Excel and PDF export. *Python, python-telegram-bot, async SQLAlchemy, PostgreSQL, Alembic, pandas, Docker, pytest.*
- **SaveClip** — @saveclipuz_bot: media downloader bot for Instagram (Reels, posts, carousels), TikTok (no watermark), X and Pinterest; HD/2K/4K quality, files over Telegram's 50 MB bot limit sent without recompression, one-tap MP3 extraction, group mode, uz/ru/en, rate limiting, SSRF protection, admin panel and broadcast. *Python, yt-dlp, ffmpeg, aiosqlite, APScheduler, Docker.*
- **Buy a Ticket Bot**: event ticketing in Telegram — speaker/topic selection, seat booking, Click/Payme payments and QR-code tickets. *Python, python-telegram-bot, Django Admin.* Also: Gym Management and Language Learning bots.

SKILLS

Languages: Python, TypeScript, JavaScript, SQL
Frontend: React, Next.js (App Router), Tailwind CSS, Framer Motion, GSAP, Three.js / React Three Fiber, i18next, next-intl
Backend: Django, DRF, FastAPI, NestJS, Prisma, SQLAlchemy, REST API design, JWT, Celery, BullMQ, WebSockets
Databases: PostgreSQL, Redis, SQLite
DevOps & Testing: Docker, Docker Compose, Caddy, Linux, Git/GitHub, CI/CD, Postman, pytest, Jest, Vitest, Playwright
AI: AI-assisted development (Claude Code), generative AI APIs (Gemini/Vertex AI, fal.ai, Kie.ai), prompt engineering

TRAINING & CERTIFICATION

Ustudy Academy, IT Park Uzbekistan — Python Backend Development Program Sep 2025 – Sep 2026

- 12-module track, graded project per module: PostgreSQL, Django/DRF (JWT, permissions), Redis caching, ORM optimization, Celery, Channels (WebSockets), Docker, CI/CD.

Meta Back-End Developer Professional Certificate — Coursera Jun 2025

Prompt Engineering for AI Systems — Five Million AI Leaders (Uzbekistan & UAE) Mar 2026

EDUCATION

National University of Uzbekistan — Bachelor's, Computer Science and Programming Technologies 2022 – 2026

LANGUAGES

Uzbek (native) • English (Intermediate) • Russian (Beginner)
